SUMMARY

Senior Product and Analytics professional with 7+ years of international experience across SaaS startups and retail tech. Track record of leading data and product teams, automating operational workflows, and delivering insights that drive revenue, efficiency and customer satisfaction. Equally comfortable shaping strategy and getting hands-on with implementation. French native, fully bilingual in English. **Technical stack:** Advanced SQL, Python, dbt, Airflow, git, Tableau.

EXPERIENCE

Strategy and Operations Manager — NIKE EHQ — Amsterdam, Netherlands

Sep. 2024 – Jan. 2026

- Modelled EMEA store potential across sell-through, traffic, conversion and market trends to surface **10** new high-potential locations.
- Built and scaled a cross-functional operating model across **200+** stores in EMEA, aligning **5** teams and driving **100%** on-time delivery of product and marketing initiatives.
- Secured **\$100M** in campaign revenue by translating Global seasonal strategy into coordination playbooks.
- Set up and led weekly cross-functional alignments with **10** stakeholders across marketing, commercial, and analytics to track execution progress, flag blockers and ensure planning stayed in sync.

Sr. Product and Analytics Manager — NIKE EHQ — Amsterdam, Netherlands

Jun. 2022 – Sep. 2024

- Owned the digital commerce quarterly intake process, standardizing cadence, scoping, and delivery planning across cross-functional teams, increasing project delivery rate by **20%**.
- Developed a member retention framework across **15** purchase journeys, shipping a self-serve Tableau dashboard used by **9** teams that lifted repeat-purchase rate **+3pp** in EMEA.
- Partnered with Marketing Science to design **30+** A/B tests measuring incremental impact of bespoke member communications on purchase and activity behaviors.
- Generated **\$50M** in incremental campaign demand through data-driven experimentation (SQL, Adobe Analytics) and market research.

Data Product Lead — FOXINTELLIGENCE by NielsenIQ — Paris, France

Jan. 2021 – June 2022

- Rebuilt the product function for a multimillion-€ ARR B2B analytics SaaS platform (**100+** corporate clients, **1,000+** users) from zero, hiring and structuring a **5-person** cross-functional team and achieving **0%** turnover.
- Launched a freemium acquisition model that grew new user acquisition by **40%**, driving the need to build a Tableau segmentation dashboard flagging new, healthy, at-risk, and churned users, enabling Customer Success to prioritize outreach and reach a CSAT score of **82%**.
- Prioritized and shipped **500+** feature enhancements and bug fixes using RICE and Double Diamond frameworks, cutting time-to-value by **25%**.
- Partnered with engineering to define, scope, prototype and ship a major e-retailer data integration that unlocked **€2M** in net-new ARR.

Analytics Engineer and Client Operations Lead — FOXINTELLIGENCE by NielsenIQ — Paris, France

Aug. 2019 – Jan. 2021

- Reduced QA processing time by **90%** via automated weekly data quality checks using Tableau, enabling EU5 expansion.
- Reached **95%** accuracy in brand capture and categorization, saving **3** verticals (**10 clients – €2M ARR**) from churn risk.
- Built new enrichment pipelines using dbt, opening new business verticals and supporting the acquisition of **30** new enterprise clients and **€8M ARR**.
- Owned end-to-end client operations for **15+** enterprise e-commerce accounts: managed onboarding, handled customer escalations and support requests, and delivered **100%** renewals and upsells across the full portfolio.
